

TXF Creator 1.3.1

Import stock trades from Etrade, Schwab, Interactive Brokers and others into TurboTax or TaxCut.

With TXF Creator, you can convert stock trades from various brokerage accounts to TXF (Trade eXchange Format) files with just a few clicks of the mouse. You can then import your gains and losses into any tax software program that accepts TXF such as TurboTax and TaxCut. Don't spend hours working on calculations for your capital gains tax forms. Get TXF Creator to generate TXF files in no time.

TXF Creator is downloadable software with a single-user license that never expires. The single-user license fee of TXF Creator is as low as \$4.99. No additional costs or fees are required.
